## INTRODUCTION

WHILE preparing the copy for this catalog, we have just been informed that one of our introductions, *Jersey's Triumph*, has won the Gold Medal of the Dutch General Bulb Growers Society for the best foreign Dahlia grown in the Trial Garden in Holland, 1931. This, of course, pleases us very much.

We grow many more varieties than we have here described and we expect to have plants of all the worth-while new ones. Send us your Dahlia wants and we will gladly quote you.

Thanking you for past favors and assuring you prompt and efficient service.

W. H. WAITE.

## *General Information*

### **ORDER EARLY**

**S**TOCK of some of the varieties is limited, so to avoid disappointment please order early. All orders will be filled strictly in rotation, stock will be reserved, as the orders are received, and shipped at the time desired.

### **ROOTS**

All orders for roots will be filled with strong divisions of field grown roots.

After that date roots will be guaranteed, and will be replaced free of charge if they should prove blind. Many of the failures with plants and roots are due to causes entirely beyond our control, such as weather, or soil conditions, bad planting, etc., and while we take the greatest care to send out only stock which will produce satisfactory results, we cannot be held responsible for failure.

We also exercise the greatest care to have all stock true to name, but should any of them prove otherwise, it is mutually agreed between the purchaser and ourselves, that we shall not be held liable for a greater amount than the original purchase price of the stock.

### **TERMS**

Cash or satisfactory reference before shipment. 30 days from date of invoice to those who have established credit with us.

No goods shipped C.O.D. unless 50% of purchase price accompanies order.

Should they not arrive in good condition, I will either replace them or cheerfully refund the money.

### **TIME FOR PLANTS**

I will ship plants any time desired after May 1st, but recommend from May 20th to June 20th as being the best.

*Inspector's certificate accompanies each shipment*

## Waite's Gardens New Introductions for 1932

### **ALASKA** *Formal Decorative*

A full-petaled flower of the most perfect form. Its color is a pure, definite white having a beautiful sheen and much substance. The stems are straight, strong, but not clumsy, holding the flower facing and slightly up. Foliage is dark green, leathery and of insect resistant thickness. The bush is fairly tall and one of the healthiest we have grown.

**Roots \$10.00, Plants \$5.00**

### **CHAPPAQUA CHIEFTAIN** *Formal Decorative*

A bizarre bicolor of henna colored petals, tipped with white, giving a striking effect and attracting immediate attention. The stems are dark, stiff and wiry. An ideal variety for cut flower use.

**Roots \$5.00, Plants \$2.50**

### **CYNTHIA** (Lauer-Waite) *Informal Decorative*

Flowers are very large and massive, on splendid stems. The color is light mallow purple. A very strong and robust grower.

**Roots \$10.00, Plants \$5.00**

### **HALLOWE'EN** *Informal Decorative*

The face of the petals is a clear buff with a bright salmon reverse. This combination gives the flower a deep peach center shading to lighter tones. The flower is held rigid and facing on stems that are sturdy and straight. Blooms can be grown 10 to 12 inches across with good depth. When Derrill W. Hart placed Hallowe'en on his roll of honor, he said: "Here is one of the most unusual color effects we have ever seen in a Dahlia . . ."

**Roots \$15.00, Plants \$7.50**

### **JERSEY'S MELODY** (Waite) *Semi-Cactus*

Tyrian rose shading to silver on the tips with a silver reverse. A striking variety on a fine, stiff stem.

**Roots \$10.00, Plants \$5.00**

### **RICHMOND** (Neumann) *Informal Decorative*

Carmine red flowers, large and well formed; a very profuse bloomer. The stems while slender are stiff and canelike, holding the large flowers well above the foliage.

**Roots \$10.00, Plants \$5.00**

CARDINALIS

## Waite's Gardens Former Introductions

### **ANTARTICA** (MacDonald) *Formal Decorative*

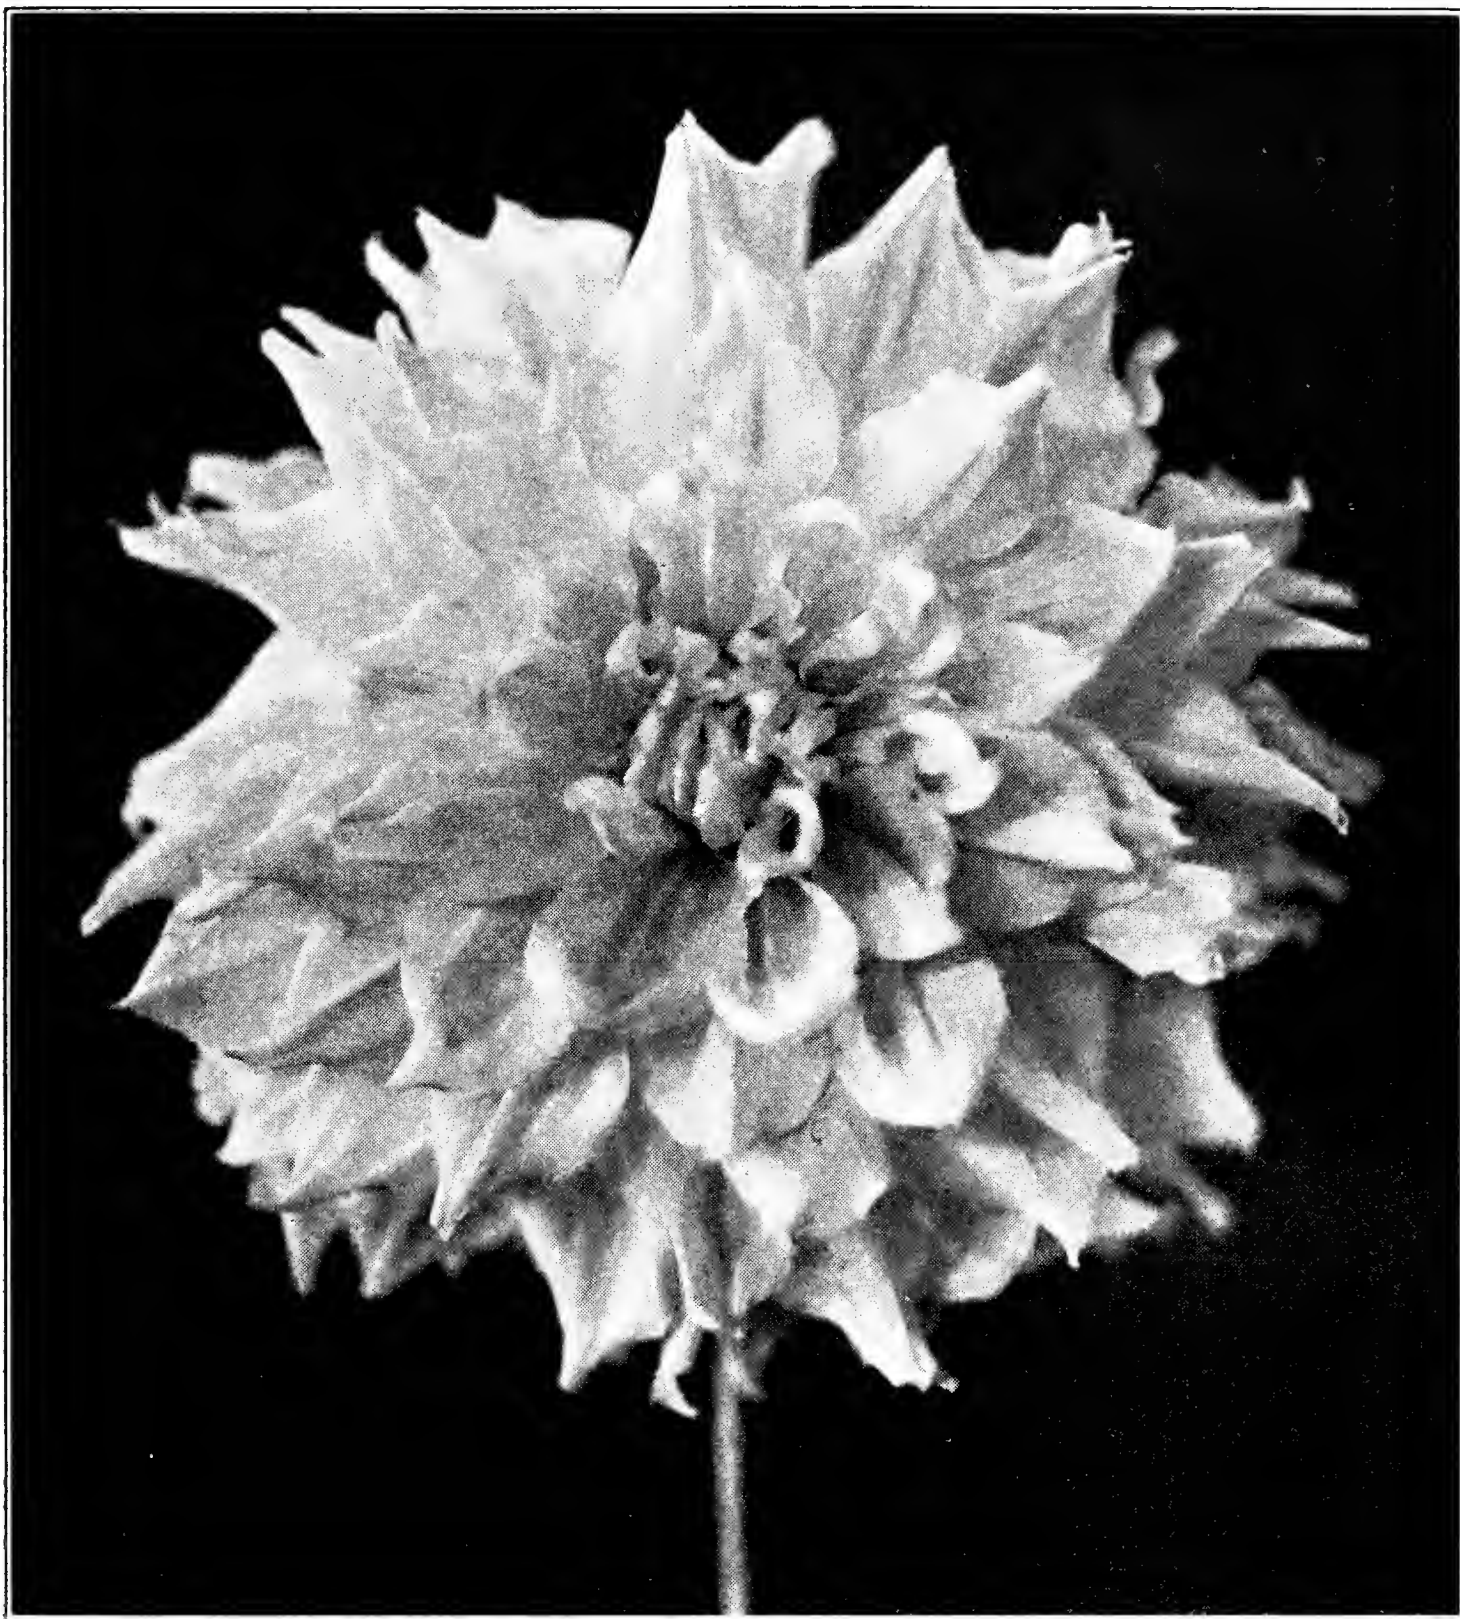

This is a pure white of large size, very free flowering, with an excellent habit of growth. The long, sturdy stems carry the flowers erect at all times. For a white, the foliage is exceptionally rugged and healthy, and both an exhibition and cut flower variety. It is an acquisition. (See illustration, front cover.)

**Roots \$3.00, Plants \$1.50**

### **CARDINALIS** (James Kennedy) *Formal Decorative*

Winner as best undisseminated seedling at Trenton, in an extra strong class. It is a brilliant cardinal red, splendid formation. The flowers are borne on strong, upright stems.

**Roots \$5.00, Plants \$2.50**

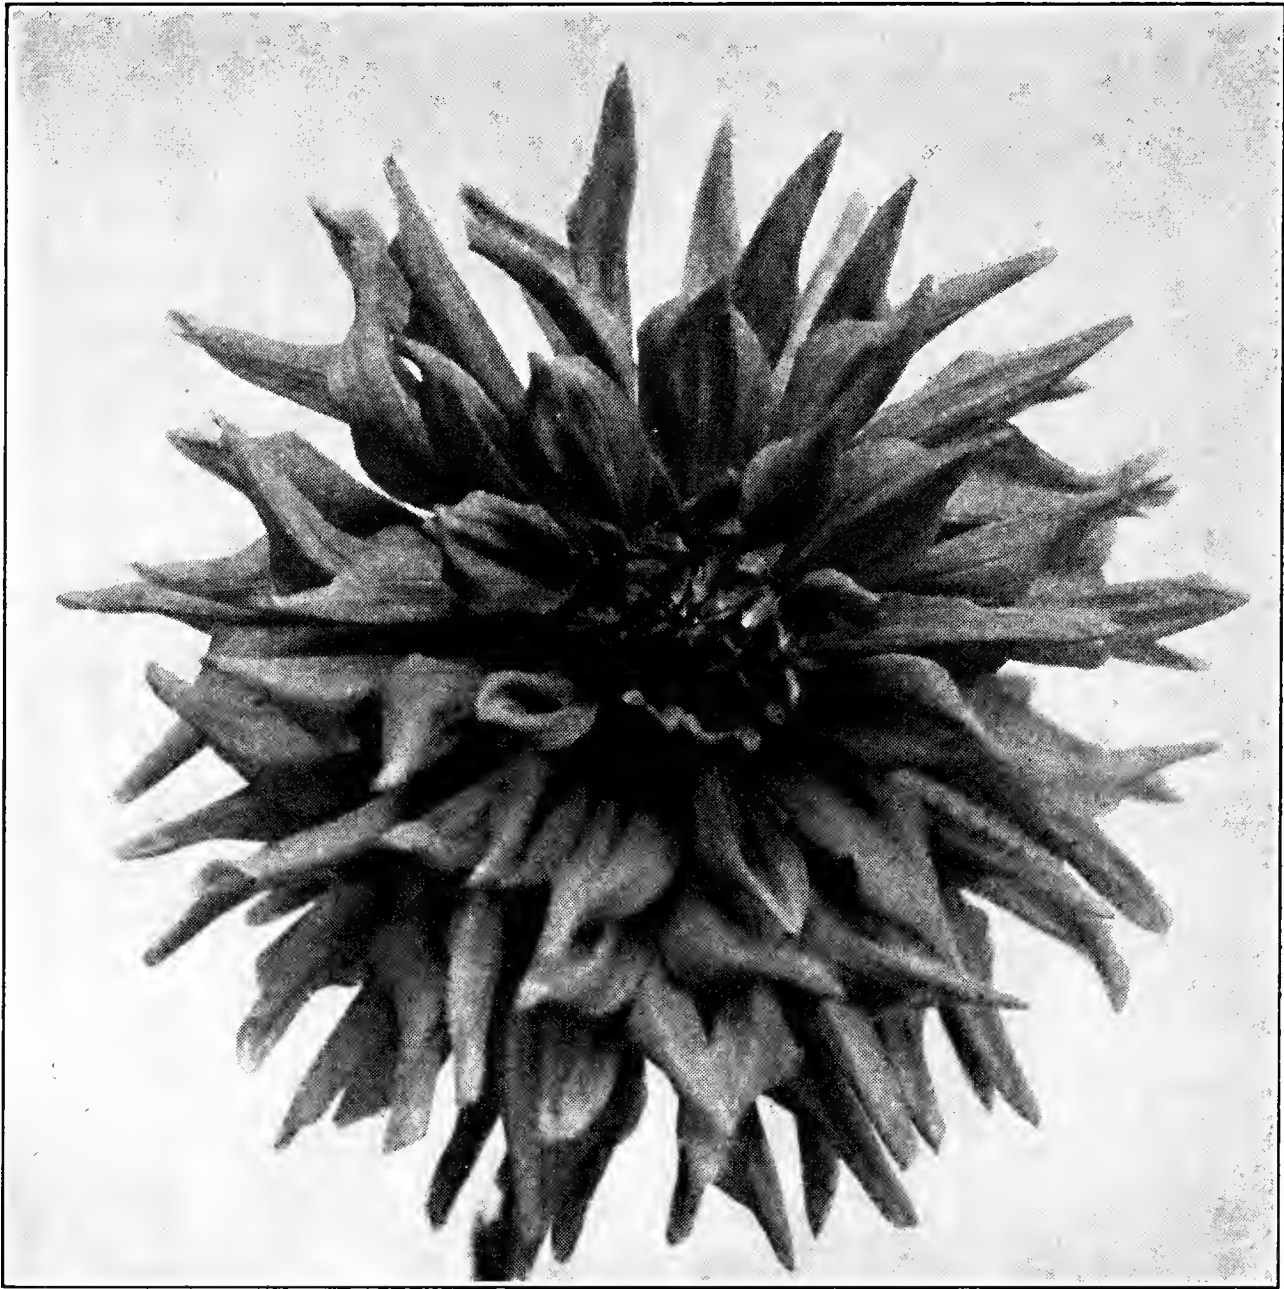

CAPTAIN COSTE

**CAPTAIN COSTE** (Curran) *Informal Decorative*

This is an exhibition flower of the type that we only see every few years. The flowers are always large and bold, many going over 12 inches. The stems are very stout and the large flowers are borne on the side and well above the foliage. The color is clear empire yellow and looks yellow under artificial light. It is a strong and vigorous grower and has the most robust foliage that I ever saw on a yellow variety.

**Roots \$10.00, Plants \$5.00**

JEAN TRIMBEE

### **JEAN TRIMBEE** (Trimbee) *Semi-Cactus*

This beautiful variety is a native of Canada, having been raised by Mr. Trimbee of Lambton Mills, and exhibited at Toronto for the past two years. The flowers are very large, many over 12 inches, and a beautiful rich Petunia violet in color. It has a strong, vigorous habit and the large, attractive flowers are produced very freely.

**Roots \$7.50, Plants \$3.75**

### **JERSEY'S BEACON** *Formal Decorative*

This Dahlia has become a universal favorite. As an exhibition flower, it has few equals in its color, but as a garden variety it is even more spectacular. The color is Chinese scarlet, with a paler reverse, giving it a two-toned effect. The flowers are large and globular in shape; it is a vigorous grower and has splendid insect-resisting foliage.

**Roots 50c.**

**JERSEY'S BEAUTY (Waite)** *Formal Decorative*

The most popular Dahlia in commerce today. A glorious flower of eosine pink—a color difficult to adequately describe. As a cut flower or for exhibition it is unrivaled. Fine stems and foliage.

**Roots 50c.**

**JERSEY'S BUTTERCUP (Waite's Gardens)**  
*Formal Decorative*

The color of this Dahlia is picric yellow throughout September, but earlier in the season the outer florets are tinged with amber. It makes a wide spreading bush and is covered with bloom throughout the whole season. It was greatly admired the past season. This Dahlia is not a large variety but can be grown to good size if kept disbudded. It is a good cut flower variety cutting an armful of it at one time, and the stems are slender and stiff, and just right for vase work.

**Roots \$5.00, Plants \$2.50**

**JERSEY'S DAYBREAK** *Formal Decorative*

Hermosa pink shading to creamy yellow in the center. Flowers of medium size, splendid formation, holding the pointed center well to the last. The stems are as rigid as canes and foliage is of leathery texture. Very much admired by all visitors.

**Roots \$2.00, Plants \$1.00**

**JERSEY'S HARMONY (Waite's Gardens)**  
*Formal Decorative*

This is a very free flowering variety and possibly better for the garden than the exhibition table. The color is blush shading to white in the center and the florets when opening are streaked with amaranth pink. It is not a tall grower and the large bushes are laden with flowers. The foliage is clean and glossy and the flower stem very stiff.

**Roots \$2.50, Plants \$1.25**

### **JERSEY'S GLORY** *Formal Decorative*

The flowers are large and of good form, well placed on the stem. The color is best described as a yellow hue of orange. The stems are long and stiff, but sometimes arch gracefully. It is a robust grower and the flowers are produced very freely; the leaves, thick and leathery in texture. The long stems branch freely from the base and the stems may be cut as long as that of Jersey's Beauty.

**Roots \$2.50 Plants \$1.25**

### **JERSEY'S MAMMOTH** *Semi-Cactus*

Huge flowers of rich golden mahogany. Truly a monster and recommended only to those who want the very largest blooms.

**Roots \$1.25, Plants 65c.**

### **JERSEY'S MASTERPIECE** *Informal Decorative*

Strawberry pink suffused gold at base of the florets. This is a bold and upstanding variety, possessing all the attributes of an exhibition variety. The stems are strong and stiff and the foliage is thick in texture.

**Roots \$1.00, Plants 50c.**

### **JERSEY'S METEOR** (Waite's Gardens) *Formal Decorative*

A strong, vigorous grower of the Jersey's Beacon type of which it is a seedling and very much like the parent except in the color which is light salmon orange. Strong, robust foliage and a splendid exhibition flower of practically a new shade. The stem is good and holds the bloom erect.

**Roots \$5.00, Plants \$2.50**

### **JERSEY'S RADIANT** *Semi-Cactus*

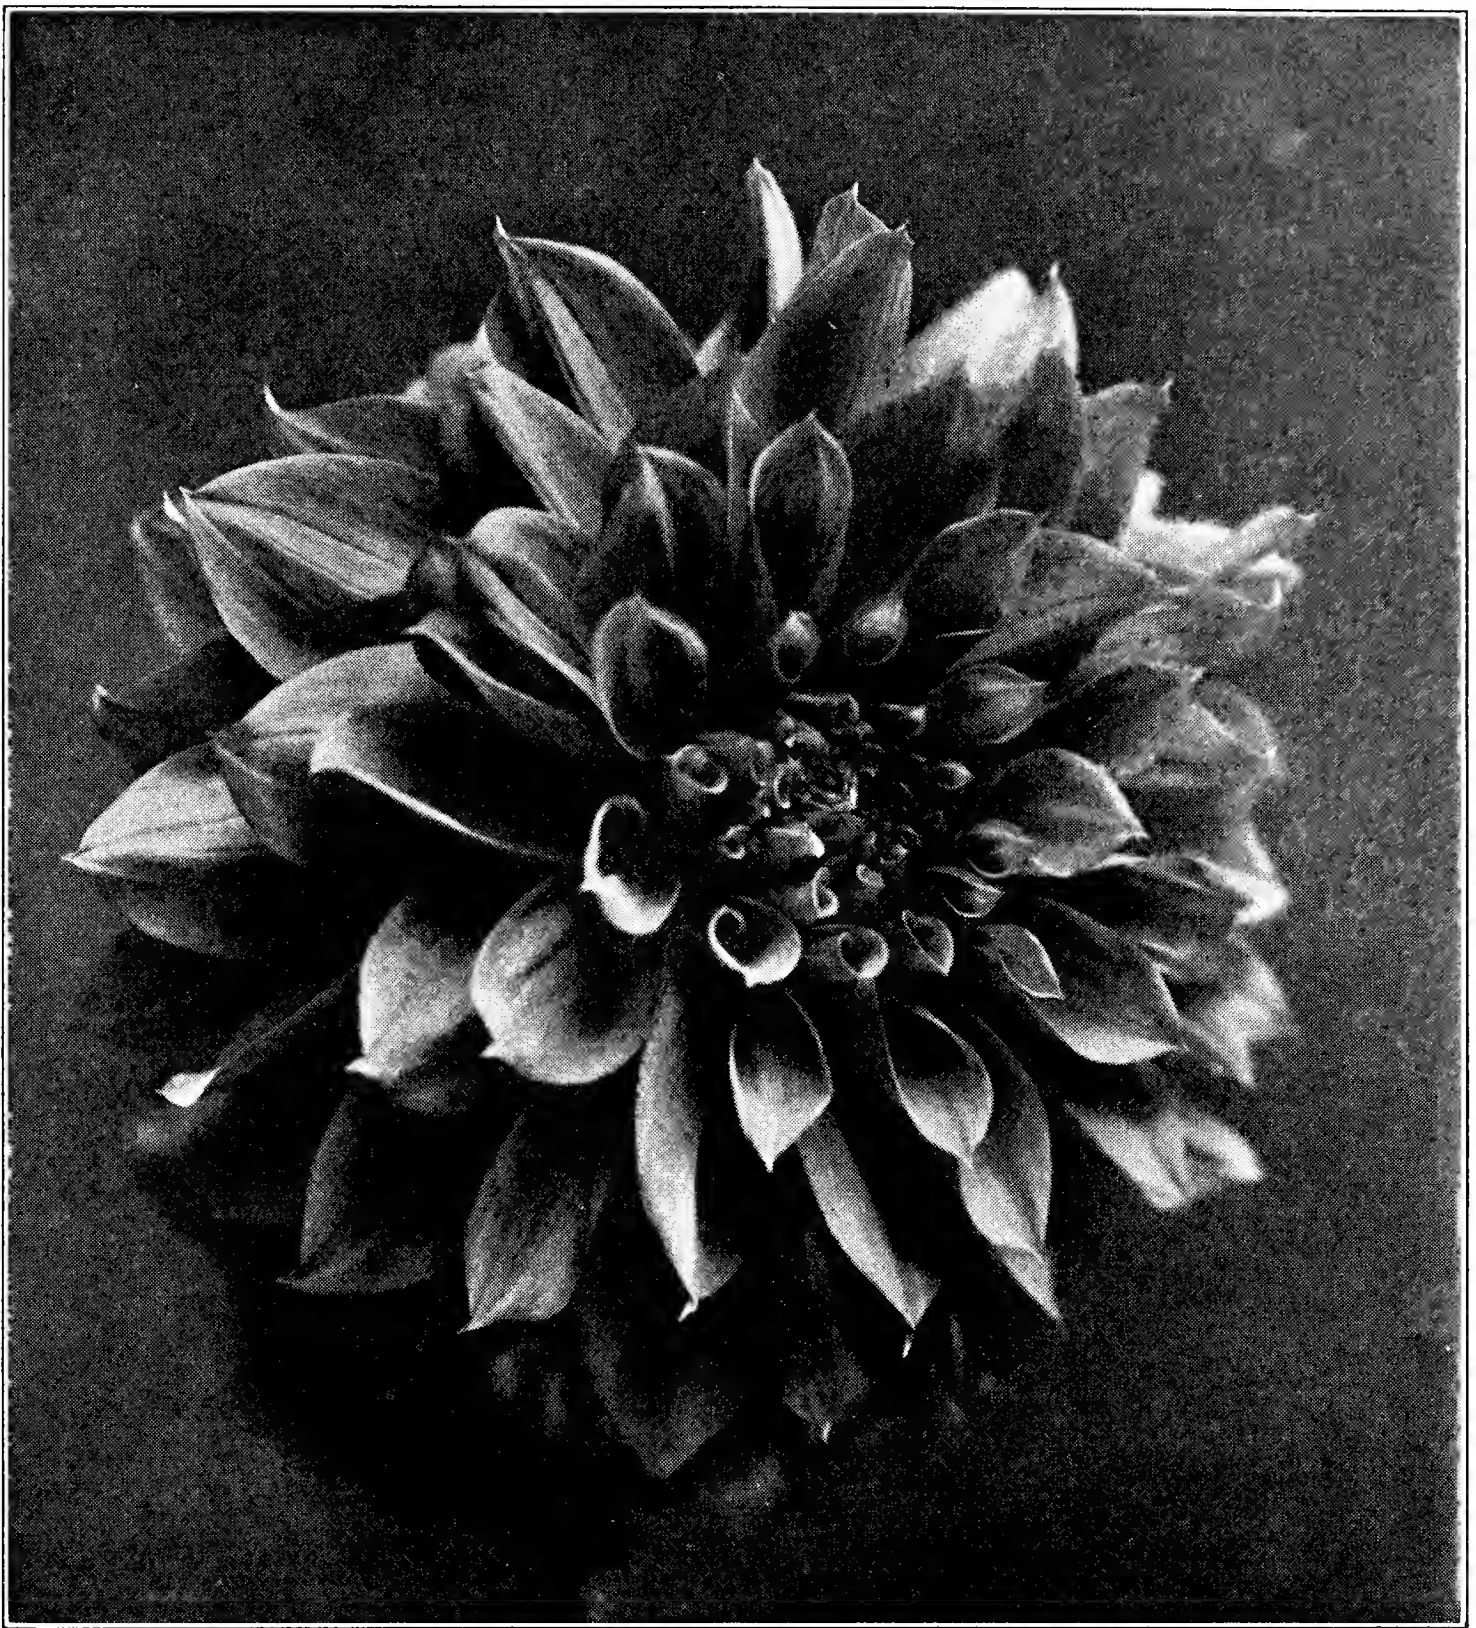

Large flowers of Bittersweet orange. Long, stiff stems. Very attractive and a great favorite.

**Roots 50c.**

### **JERSEY'S SOVEREIGN** *Formal Decorative*

An indescribable shade of salmon orange. Vigorous grower. Dark foliage.

**Roots 50c.**

JERSEY'S TRIUMPH

**JERSEY'S TRIUMPH** (Waite) *Formal Decorative*

Ever since we introduced Jersey's Beauty we have been looking for another Dahlia that had the same habit, and out of the thousands of seedlings that we have raised, this is the only one that has ever shown the same habit. There are sports from Jersey's Beauty that of course have the same habit, but this is a seedling from the same parents and is identical with Jersey's Beauty in habit and growth that they cannot be distinguished apart before they bloom. The color, however, is entirely different and is a real Autumn shade of bright copper flushed with salmon bronze. We predict a great future for this variety as a cut flower, as there is nothing just like it in the long-stemmed Dahlia. (Winner of the Holland Gold Medal, 1931)

**Roots \$2.50, Plants \$1.25**

MABEL S. DOUGLAS

### KATHERINE COLE (McDowell) *Formal Decorative*

At 1929 New York Show this beautiful Dahlia was shown under number and won the Darnell Cup for the best keeping variety. In color it is a beautiful combination of light pink and cream. The tips of the petals are pink shading to cream in the center. The stems are long and stiff, yet not thick, and the flower is always looking you in the eye. The foliage is thick and healthy and, above all, it is a free bloomer.

**Roots \$3.00, Plants \$1.50**

### MABEL S. DOUGLAS (Thompson) *Informal Decorative*

This is one of the largest of the new Dahlias and came near being the sensation of the New York Show, where it won first in one of the seedling classes. In color it is clear pastel lavender. It is a large flower and might easily become popular for the largest bloom classes, as it is one of those flowers that will measure much larger than it looks, on account of the graceful curl of the long petals. Exceptionally good and the foliage and habit of growth are excellent.

**Roots \$5.00, Plants \$2.50**

TARRYTOWN

**TARRYTOWN** (MacDonald) *Informal Decorative*

This is a splendid new variety that I have been fortunate in securing. I saw this variety at several shows for the past two years and always admired it. It was awarded a Certificate of Merit at the Westchester and Fairfield Horticultural Society Show, scoring 89 points. It was in good company, as this is a show where only an expert can win. In color it is principally bronze, shading darker toward the edges of the large broad petals. It is an excellent grower with heavy texture foliage. The stems are strong and hold the finely formed flowers well up above the foliage.

**Roots \$5.00, Plants \$2.50**

**YELLOW BEAUTY** (Wood) *Formal Decorative*

This splendid new yellow Dahlia while primarily a commercial Dahlia, yet can be grown to exhibition size. I have seen many 9 inches across and from 4 to 5 inches in depth. It has the long, free branching habit of its parent Jersey's Beauty, and a plant pinched once or twice can carry eight to twelve perfect flowers, none less than 6 inches. The stems are more slender than Jersey's Beauty, yet always stiff, holding the flowers erect and at a proper angle for vase work.

**Roots \$2.00, Plants \$1.00**

FUGI SAN

## Hybrid Delphinium. *Perennial Larkspur*

There are few hardy perennials that have the charm of the Delphinium, varying in color from the palest sky blue to the deepest indigo and in height from 3 to 8 feet.

They are not fastidious in their culture, succeeding in most well-tilled soils.

To obtain the best results, plant them in well enriched soil and give plenty of water during the growing season.

To get immediate results, strong, one-year-old field grown plants should be used, as they possess all of their initial vigor. They should be planted in the Fall or very early Spring, just as soon as the frost is out of the ground.

We have been collecting Delphiniums for a number of years, having purchased stock from all of the specialists, both at home and abroad, and from all of the various strains we have selected the very best, and we now have to offer a fine lot of specially selected, field-grown plants that are sure to satisfy all lovers of this fine, hardy flower.

**Strong, field grown plants, 75c. each, \$8.00 per doz., \$50.00 per 100**

## Pot-Grown Delphiniums

We are also offering for Spring delivery only, strong, pot-grown plants of the Wrexham strain of Delphiniums. These plants are grown from the very best imported English seed and are the same that we will be using for our own planting. To those who have had difficulty in germinating the seed of this wonderful strain of Delphinium this is an opportunity to get these young unflowered plants, and thus get the initial benefit from them. These plants will all bloom from August until frost, giving spikes from 3 feet to 4 feet in height and the following year they will be at their best.

Plants carefully packed and guaranteed to arrive safely.

**\$6.00 per doz., \$40.00 per 100**

## Superb Gladiolus

These grand flowers still maintain their leadership among Summer flowering bulbs. And they have not yet reached perfection, for year after year, new and improved types are being introduced, showing larger flowers and novel shades, that are replacing rapidly the older sorts.

Gladiolus are easily grown, blooms can be had over a long period by planting them from April until July. The Primulinus varieties usually bloom, with favorable weather, in 60 days and the large flowering sorts from 70 to 100 days. Planting about 4 inches deep will suit the average conditions.

### SPECIAL AND NEWER VARIETIES

## Hardy Garden Lilies

The Lilies listed below are for Spring planting and should be planted by June 1st. Bulbs should be planted 6 inches deep except where noted. Lilies do best in the hardy border or among shrubbery, because the flowering stems bear masses of roots immediately below the ground surface, and the shady situation helps protect these feeding roots from the hot sun. Lilies thrive in any well drained garden soil where the ground does not become water logged, but do not want to come in contact with fresh manure.

**Auratum** (The Gold-banded Lily of Japan). Delicate ivory white color, thickly studded with chocolate, crimson spots and striped through the center with a golden yellow band. Should be planted 8 to 10 in. deep in sunny or partly shaded situation. Does best where lime is not in soil. Flowers July-August.
